## Air purification of Krion K-Life

In the atmosphere and in our homes, due to pollution there are certain gases which are dangerous for humans and nature. In particular, these gases are nitrogen oxides (NOx), sulphur oxides (SOx) and volatile organic compounds (VOCs). When any of these gases come into contact with the activated Krion™ Eco-Active surface, there is a chemical degradation, generating harmless products such as mineral salts and water.

В результате загрязнения в атмосфере и в наших домах присутствуют определенные газы, являющиеся опасными для людей, а также для самой природы. Речь идет прежде всего об оксидах азота (NOx), оксидах серы (SOx) и летучих органических соединениях (ЛОС). Когда эти газы вступают в контакт с поверхностью Krion® Eco-Active, начинается химическая реакция разложения, в результате которой образуются такие безопасные продукты, как минеральные соли и вода.

由于大气中及家里的污染，一些气体会对人体及大自然产生危害，如氮、硫的氧化物（NOx，SOx），以及挥发性有机化合物（VOC）。当这些气体与Krion® Eco-Active产品的表面接触时，就会引起化学反应开始蚀化，产生非侵蚀性的物质如盐类及水。

1m<sup>2</sup>  
=  
6,5

It has been accredited in air purification both indoors and outdoors, certifying that 1 m<sup>2</sup> of the new Krion™ Eco-Active can purify the necessary air for 6.5 people to breathe pure air for a year.

Доказано, что этот материал очищает воздух во внутренних помещениях и наружных пространствах: 1 м<sup>2</sup> нового материала Krion® Eco-Active может очистить воздух, необходимый для того, чтобы 6,5 человек дышали чистым воздухом в течение одного года.

其室外及室内的空气净化作用已得到认证，具体为：一平方米的Krion® Eco-Active新产品可净化供6.5个人呼吸一年的空气。

## International certificates and ecological standards

The new Krion™ Eco-Active has been evaluated by prestigious external laboratories, following the strictest international ISO standards, certifying the effectiveness of the new material.

Новый Krion® Eco-Active получил оценку престижных внешних лабораторий, которые в процессе сертификации эффективности нового материала следовали строгим международным нормам ISO.

Krion® Eco-Active 新产品已受到权威的第三方实验室根据最严格 ISO 国际准则的认证，确保这一新材料的特性。

In a dense environment of Hi-Tech design and modern devices, sometimes you want to see nature inspired shapes in your interior. The eye rests when it sees them. The Lily flower has inspired us to create this model.

В плотном окружении Hi-Tech дизайна и современных устройств иногда хочется иметь в интерьере вещи, напоминающие природные формы. Глаз отдыхает, когда видит их. Цветок Лилии вдохновил нас на создание этой модели.

在高科技设计和现代设备的密集环境中，有时您想在室内看到大自然的灵感形状。当它看到他们的眼睛休息。百合花启发了我们创造这个模型。

The model does not provide for using of a bucket. On the back side of the litter bin there is a hatch on magnetic fasteners to provide access to a trash bag. The hatch is on the same surface with the bin body, so it is not visible.

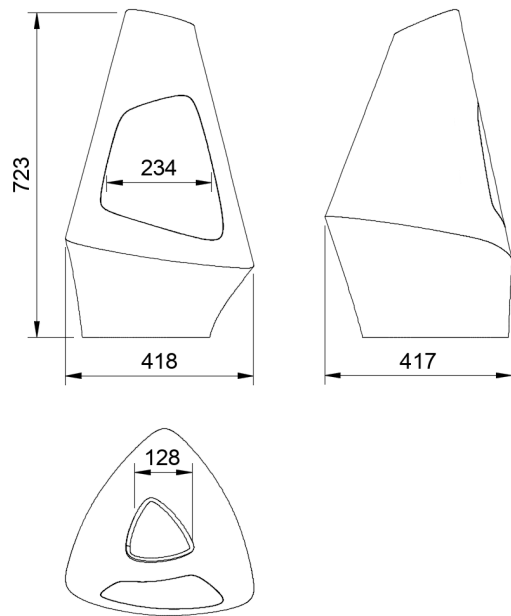

Модель не предусматривает использования ведра. Для доступа к мусорному мешку с обратной стороны урны крепится люк на магнитных крепежах. Люк находится на одной плоскости с корпусом урны, поэтому его не видно.

该模型不提供桶的使用。在垃圾箱的背面有一个舱口磁性扣件，以提供访问垃圾袋。舱口与仓体在同一表面上，因此不可见。
